

Sliding Media Storage Panel

COMPONENT CHECKLIST

A
Sliding Media
Storage Panel
(x1)

B
M4x5mm
Security
Screw
(x2)

C
M5 Flat
Washer
(x20)

REQUIRED TOOLS

- Phillips Head Screwdriver
- Power Drill
- Suitable Drill Bit
- Spirit Level
- 5mm Allen Key

EXAMPLE MOUNTING FASTENER

- ! Panel mounting fasteners are **NOT supplied** with the product.
- ! Professional installer to ensure correct mounting fastener type, location & quality to suit structure where storage panel is installed.

Wall

6mm Coach Screw/
DynaBolt™/Chemset™

Nylon
Anchor

Atdec ADB Rail

M8
T-nut
(x4)

M8x10mm
Button Head Screw
(x4)

WEIGHT RANGE

0 - 8kg
(0 - 17.5lb)

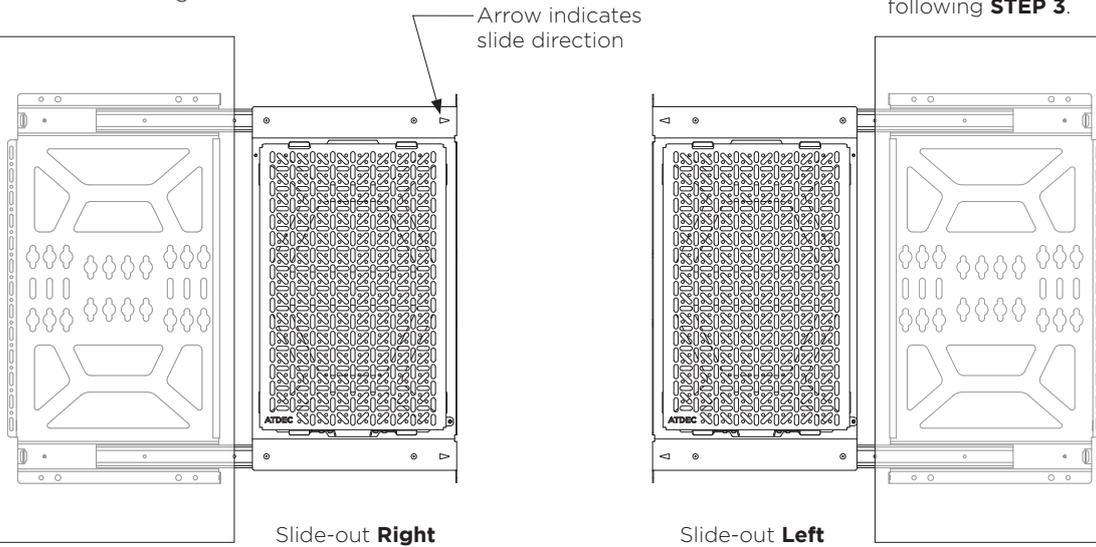

IMPORTANT INFORMATION

- ! **Please ensure this product is installed as per these installation instructions.**
- ! Please ensure combination of display, display mounting bracket and AD-AC-PS provide sufficient clearance for component mounting and sliding movement.
- ! This product is compatible with Atdec ADB series rail.
- ! The manufacturer accepts no responsibility for incorrect installation.
- ! Failure to mount this product correctly may cause serious injury/death during or following installation.
- ! This product should only be installed by professional installers of good mechanical aptitude, who have experience with basic building construction, and fully understand these instructions and the consequences of incorrect installation.
- ! Check load capacity of wall prior to installation. Failure to provide adequate structural strength for this product can result in serious personal injury or damage to equipment. It is professional installer's responsibility to ensure suitable structural capacity of wall (including appropriate safety factor) to support total weight of all equipment being mounted. Reinforce the wall structure and consult a structural engineer where required.
- ! Drilling into electrical wires can cause death - use appropriate equipment and caution when drilling holes into walls to avoid electrical cables, water pipes and gas pipes. Do not drill into structures unless you have established it's safe to do so.
- ! Product not suitable for use outdoors.

1. Choose Storage Panel Orientation

1.1 The Storage Panel can be oriented to slide-out from the left side or right side.

Note: For left hand slide-out, reposition Mounting Tray by following **STEP 3**.

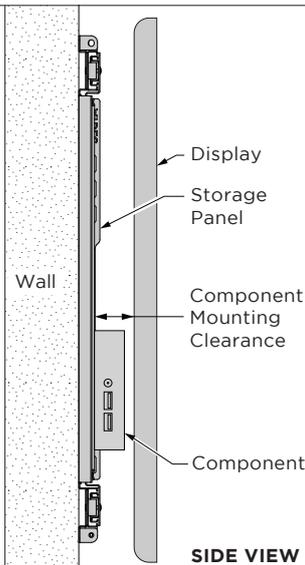

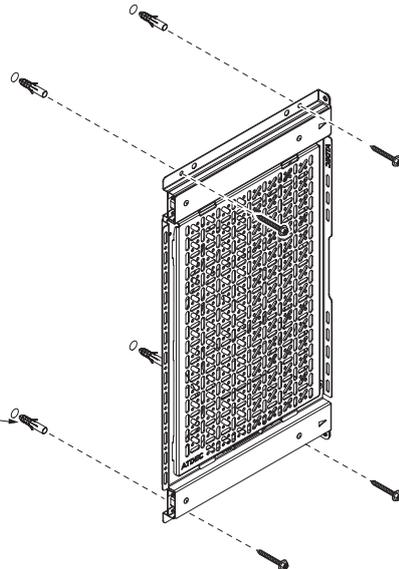

2. Mount Storage Panel

OPTION A Wall Mount

2.1 Use Storage Panel as a drilling template, drill four pilot holes and fasten Storage Panel to wall. Use spirit level to ensure panel is mounted level.

Note
Wall mounting fasteners are not supplied and should be sourced separately.

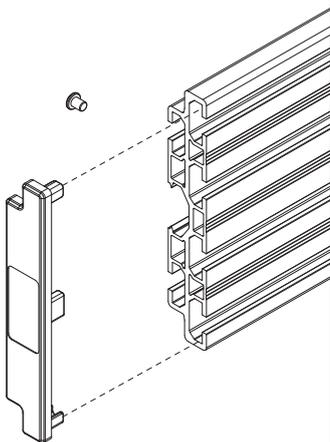

IMPORTANT

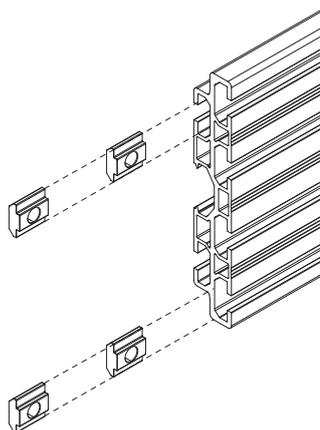

Ensure installation of display mounting bracket (sold separately) provides sufficient clearance for component mounting.

OPTION B Atdec ADB Rail Mount

2.2 Remove screw and end cap from rail.

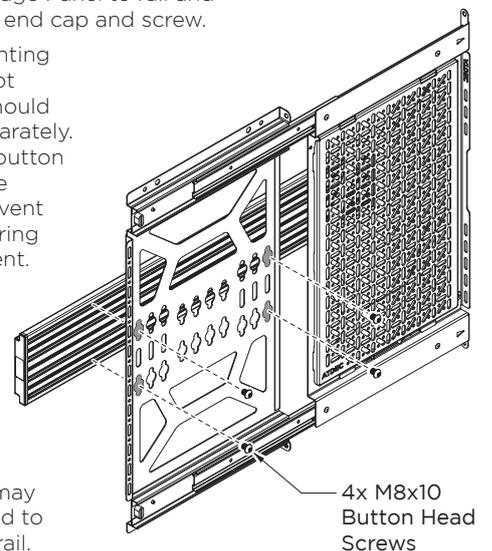

2.3 Insert M8 T-nuts. A minimum of four are required.

2.4 Attach Storage Panel to rail and reassemble the end cap and screw.

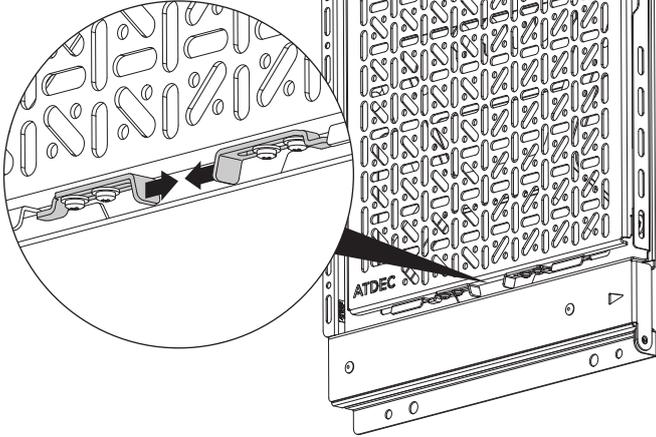

Note: Rail mounting fasteners are not supplied and should be sourced separately. Low-profile or button head screws are essential to prevent interference during sliding movement.

Storage Panel may also be mounted to the rear of the rail.

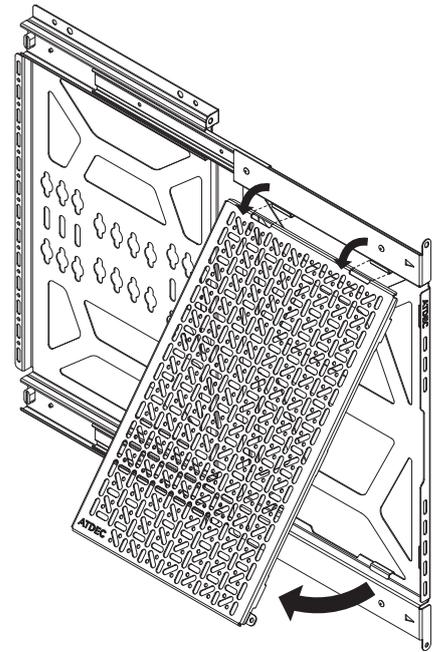

3. Attach components to Mounting Tray

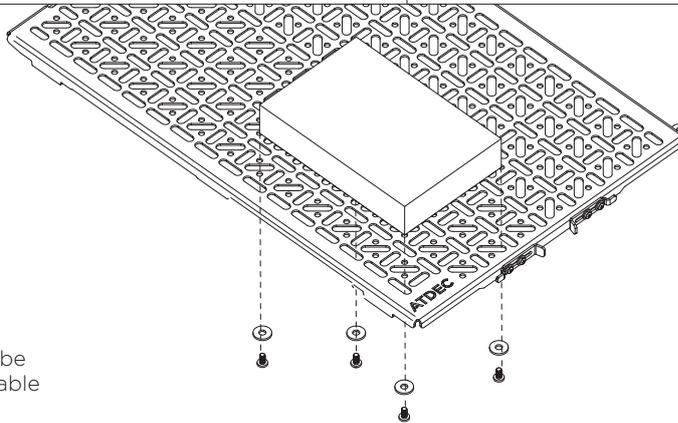

3.1 Slide the two tabs at the bottom of the tray towards each other to unlock the tray from the storage panel.

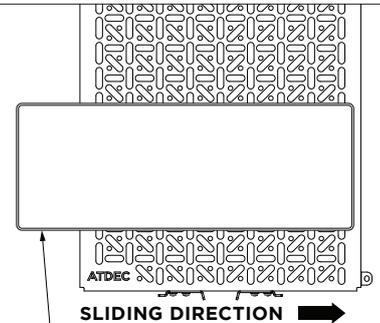

3.2 Lift out the bottom of the tray and unhook it from the top tabs.

3.3 Place media components on Mounting Tray by aligning the mounting holes of components to the hole pattern on Mounting Tray. Use the fasteners provided with the component and washers (if required) to attach the component to the Mounting Tray.

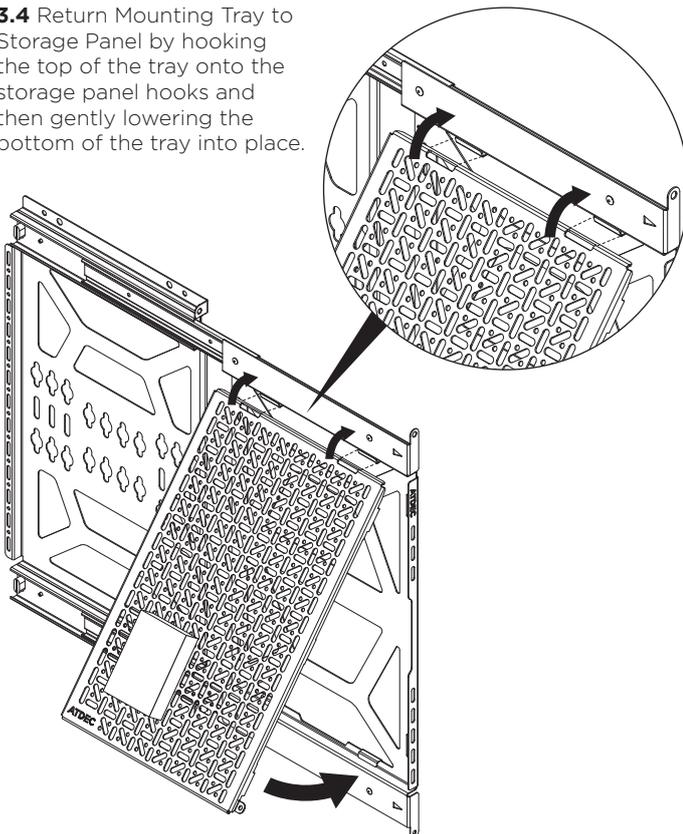

Note: Components can also be mounted to the Tray using cable ties or hook and loop strips.

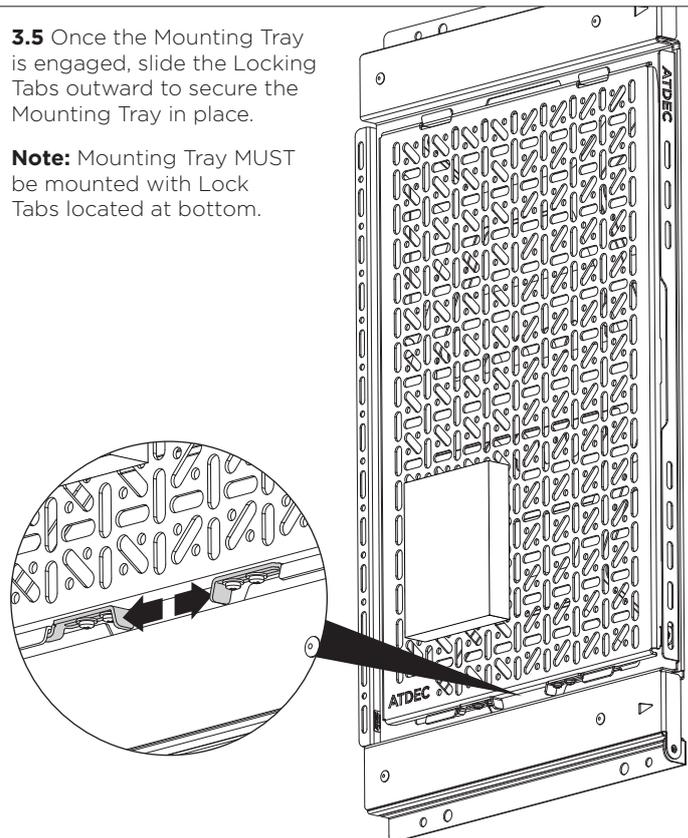

Note
Larger components can overhang side opposite to sliding direction

3.4 Return Mounting Tray to Storage Panel by hooking the top of the tray onto the storage panel hooks and then gently lowering the bottom of the tray into place.

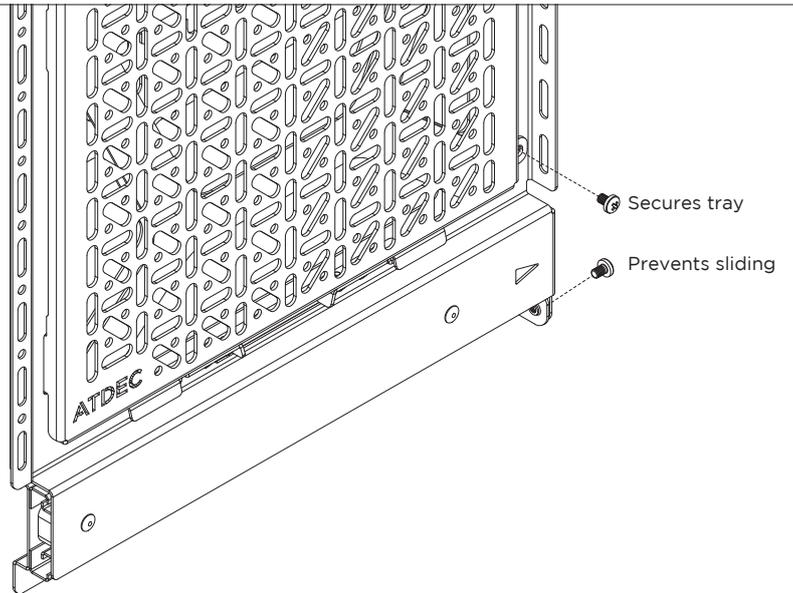

3.5 Once the Mounting Tray is engaged, slide the Locking Tabs outward to secure the Mounting Tray in place.

Note: Mounting Tray MUST be mounted with Lock Tabs located at bottom.

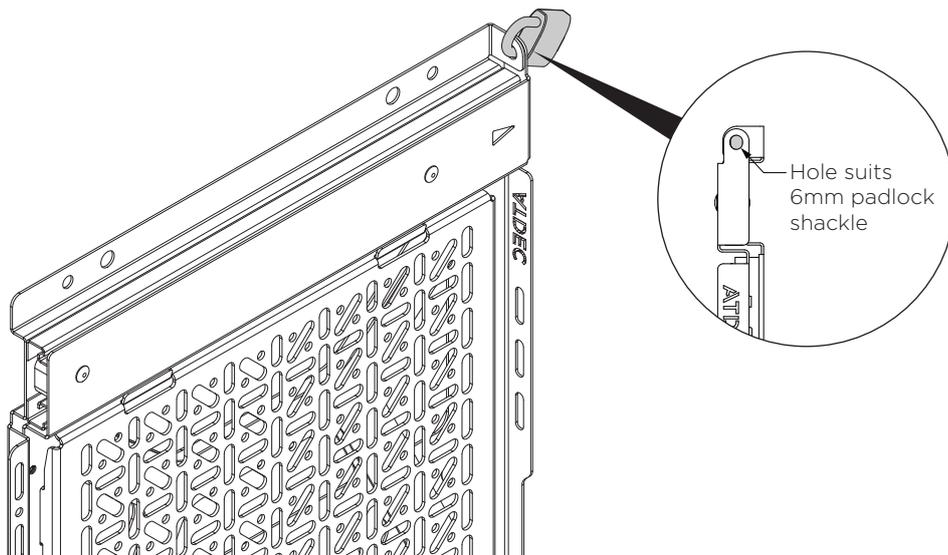

4. Security screw and padlock installation (optional)

4.1 Install the supplied security screws on the Mounting Tray and Storage Panel if needed.

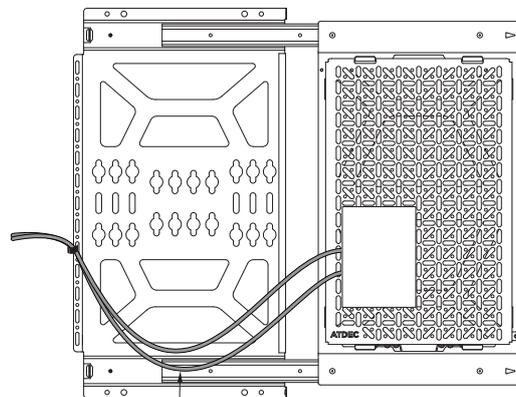

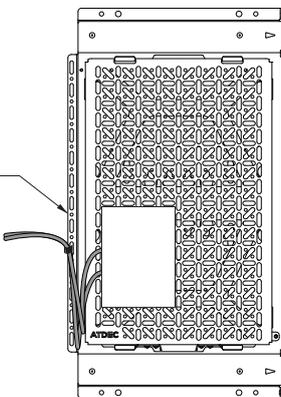

4.2 Install Padlock through anti-theft hole located at the side of Storage Panel.

Note: Padlock not included.

5. Cable Management

Cables can be secured along this edge using cable ties or hook and loop strips

Allow slack in cable for sliding movement of tray
