Optimize Your Flash Storage Investments

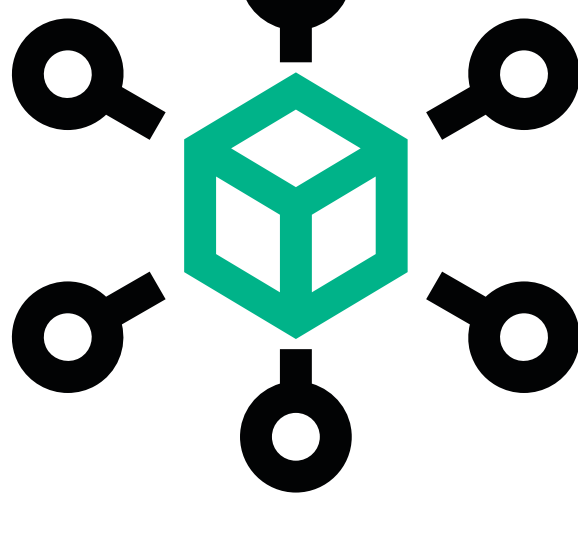

Flash storage has become a popular alternative to spinning disk drives but maintaining flash storage can be expensive if not managed properly. However, flash storage that has superior capacity and efficiency can be affordable. HPE Nimble Storage can optimize flash storage investments while saving money.

\$492,000

The average cost of an hour of application downtime¹

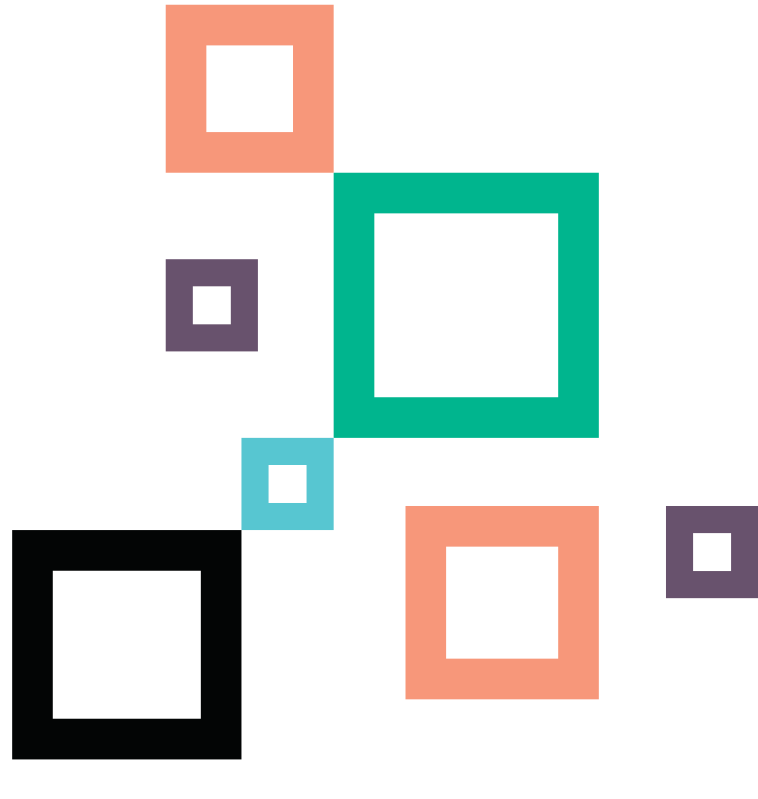

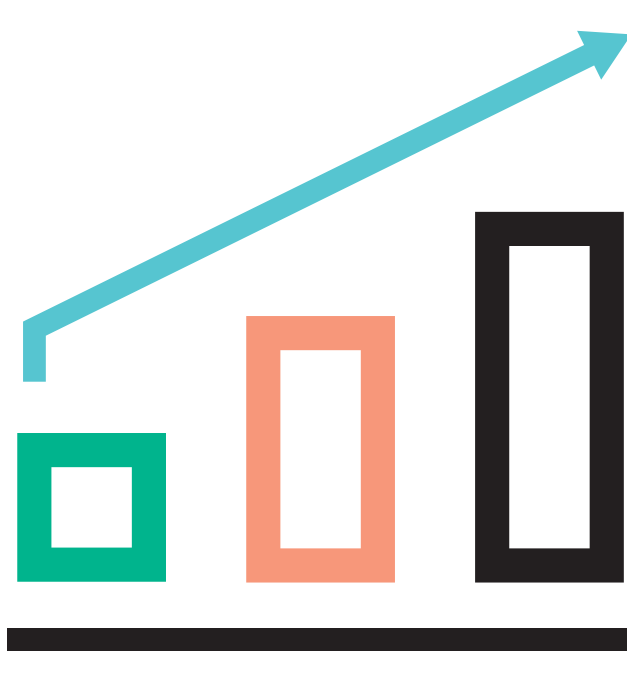

Downtime can be due to:

- Data storage infrastructure that is too complex
- Failures across storage processes
- Poor data storage management

HPE Nimble Storage can help your organization:

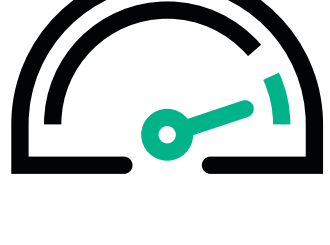

- Eliminate application downtime
- More easily balance workloads
- Reduce data storage costs

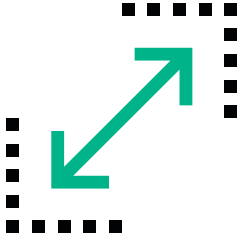

HPE Nimble Storage can help your company adapt to demand spikes and hardware or software changes through:

- Instant response times
- Always-on availability
- Anywhere, anytime access

HPE Nimble Storage benefits and differentiators include:

Performance and capacity efficiency

Seamless scalability

Integrated data protection

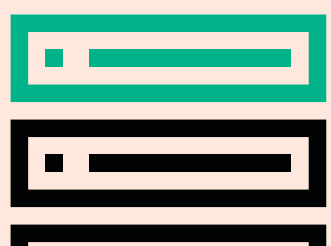

Proactive wellness

HPE Nimble Storage advanced data reduction includes abilities like:

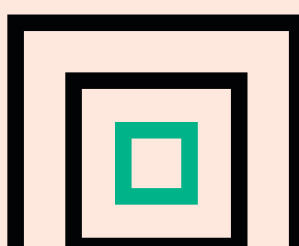

- Always-on, inline, adaptive compression
- Block folding
- Automated thin provisioning
- Copy avoidance

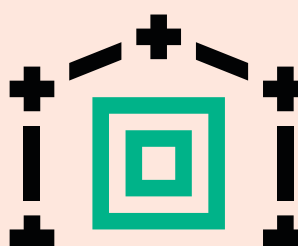

Built into HPE Nimble Storage, HPE InfoSight uses machine learning to drive intelligence across:

Servers

Storage

Virtualized resources

HPE InfoSight also:

Shifts data storage IT from reactive to predictive

Provides a holistic view across the infrastructure stack

Simplifies planning with prescriptive forecasts

HPE InfoSight has resulted in:²

19.3%

year-over-year decrease in customer-involved support cases

54%

of issues that impact uptime resolved outside of storage

More than

86%

of support cases automatically resolved
